

The NightLight Solar LED Bollard™

The "NightLight" solar light bollards are a low cost option for highlighting courtyards, driveways, parks, playgrounds, pathways, golf courses, pools, marinas, boat docks, and other areas requiring caution.

All NightLight bollard systems are completely sealed against the elements. Continuous light is provided for up to 10 hours, even longer following sunny days.

The Nightlight bollard (body) is made of tough UV weather resistant HDPE polymer, which is highly resistant to graffiti, spray paint, markers, and harsh chemicals.

All hardware consists of stainless steel screws and each light fixture is completely water tight.

The NightLight Solar LED Bollard fits over a 4" x 4" wood up to 31 1/2" tall. The NightLight is 39 3/4" Tall. Base is 9 3/16".

The durable granite finish is easy to clean and available in three colors:

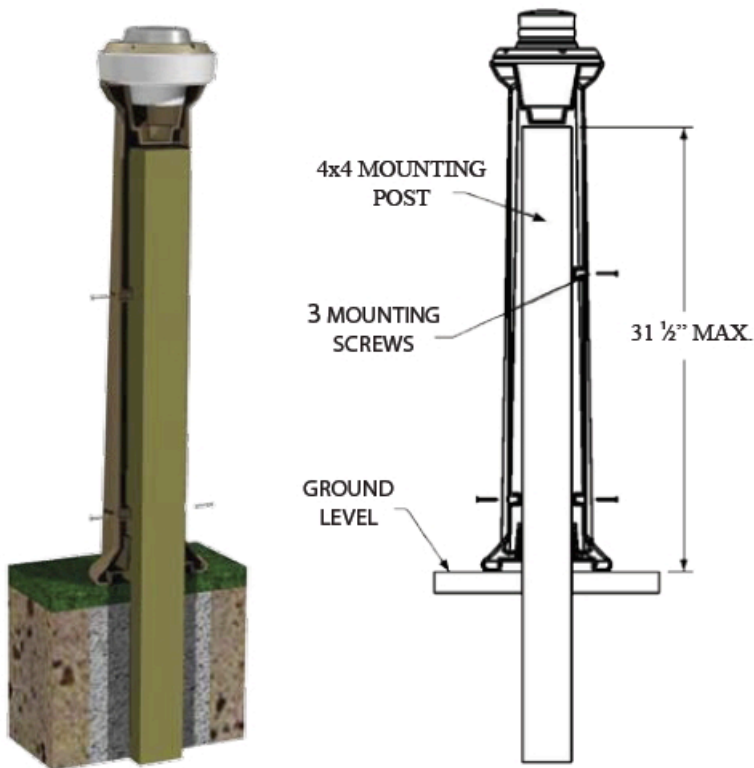

Sandstone (shown)
Grey Granite
Green Granite.

The light is provided by 4 Ultra Bright LEDs that are powered by a 567mW battery powered solar panel.

It can be ordered in either blinking or steady light. Power storage is 120 hours on full charge. Visibility is 1650 feet. Life expectancy is 7 years.

The light is 3 5/8" tall by 4 1/2 " in diameter.

The warranty on the light is 7 years.

Installation of the NightLight Bollard is best over a 4"x 4" wooden post that is buried in concrete according to your frost-line requirements.

Security screws requiring a special head are used.
